DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

1. Claims 3-5.7 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kodata et al in view of as applied to claim above, and further in view of Shirahashi et al, Sato et al and Miyawaki et al.

Kodata et al discloses everything exception a black layer around the perimeter. The use of a black matrix around the perimeter was well known for preventing light leakage and shielding for drive circuits, and would have been obvious for that reason. All the above listed references show

active matrix devices with black layers in the peripheral regions, and therefore provide evidence of this assertion of the well known status of these layers for the above mentioned purposes.

Response to Amendment

Applicants arguments are moot in view of the new ground of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
